PROFILE

Senior Data Science Engineer and AI engineering leader. 7+ years running engineering and management in parallel — shipping ML systems and growing teams. Helped scale Avenga's AI department from 7 to 30+ people; participated in a dozen presales. Available as AI Team Lead, Head of Data Science/AI, Senior DS Engineer, or consultant.

Experience

Avenga

ACQ. PERFECTIAL · NOV 2021 — Remote EU / Lviv — Feb 2019 – Mar 2026

AI Engineering Manager / Sr. AI Engineer

Aug 2022 – Mar 2026

ROLE & DEPARTMENT RESPONSIBILITIES

Department growth & team leadership

- Helped grow Avenga's AI/Data Science department from 7 to over 30 engineers over three years.
- Led distributed AI engineering teams of 5–15 data scientists and ML engineers across concurrent delivery streams.
- Ran regular 1:1s, career planning sessions and performance reviews; mentored engineers at mid and senior levels.
- Set technical direction and ML architecture standards shared across the AI practice.

Pre-sales & client engagement

- Participated in a dozen presales engagements — scoping, discovery workshops, technical proposals and client presentations.
- Translated client business goals into concrete ML/AI project plans; presented to stakeholders from engineers to C-level.
- Served as AI subject-matter expert in sales conversations — feasibility, effort estimation, risk and roadmap.

Hiring & technical evaluation

- Conducted technical interviews for AI/ML engineer roles — coding, system design and ML deep-dives.
- Designed and iterated on the interview rubric used across the AI practice; had final hiring sign-off for my teams.

AI practice & knowledge sharing

- Internal tech talks, shared evaluation patterns, reusable frameworks for RAG, agents and ML ops.
- Distilled learnings on LLMs, agentic systems and ML evaluation into internal playbooks.

YOC — Building a DSP Platform | Enterprise RAG Platform

POSITIONS CONSIDERED

- AI Team Lead
- Head of Data Science / AI
- Senior DS Engineer
- AI Consultant
