PROFILE

Senior Data Science Engineer and AI engineering leader. 7+ years running engineering and management in parallel — shipping ML systems and growing teams. Helped scale Avenga's AI department from 7 to 30+ people; participated in a dozen presales. Available as AI Team Lead, Head of Data Science/AI, Senior DS Engineer, or consultant.

Experience

Avenga

ACQ. PERFECTIAL · NOV 2021 — Remote EU / Lviv — Feb 2019 – Mar 2026

AI Engineering Manager / Sr. AI Engineer

Aug 2022 – Mar 2026

ROLE & DEPARTMENT RESPONSIBILITIES

Department growth & team leadership

- Helped grow Avenga's AI/Data Science department from 7 to over 30 engineers over three years.
- Led distributed AI engineering teams of 5–15 data scientists and ML engineers across concurrent delivery streams.
- Ran regular 1:1s, career planning sessions and performance reviews; mentored engineers at mid and senior levels.
- Set technical direction and ML architecture standards shared across the AI practice.

Pre-sales & client engagement

- Participated in a dozen presales engagements — scoping, discovery workshops, technical proposals and client presentations.
- Translated client business goals into concrete ML/AI project plans; presented to stakeholders from engineers to C-level.
- Served as AI subject-matter expert in sales conversations — feasibility, effort estimation, risk and roadmap.

Hiring & technical evaluation

- Conducted technical interviews for AI/ML engineer roles — coding, system design and ML deep-dives.
- Designed and iterated on the interview rubric used across the AI practice; had final hiring sign-off for my teams.

AI practice & knowledge sharing

- Internal tech talks, shared evaluation patterns, reusable frameworks for RAG, agents and ML ops.
- Distilled learnings on LLMs, agentic systems and ML evaluation into internal playbooks.

SELECTED PROJECTS

POSITIONS CONSIDERED

- AI Team Lead
- Head of Data Science / AI
- Senior DS Engineer
- AI Consultant

STACK

Languages
Python · JavaScript · Node.js · React

ML frameworks
Scikit-Learn · PyTorch · TensorFlow · Keras · XGBoost · TF.js

GenAI & NLP
OpenAI · LLama · Agents · OpenClaw · Faiss · Qdrant · Spacy · NLTK

Computer vision
OpenCV · PyTorch · TensorFlow · Keras

Data & viz
Pandas · NumPy · SciPy · Metaflow · Spark · Matplotlib · Seaborn · Plotly · Grafana

Web frameworks
FastAPI · Flask · Falcon

YOC — Building a DSP Platform

2025 — 2026

Service matching internal supply and demand entities against defined business rules, communicating with the bidder for inventory, campaign and reporting data. Two ML models in production with scaffolding for additional models under varying traffic.

- → Defined the ML architecture roadmap and owned delivery as engineering manager.
- → Built ML models and supporting infrastructure for training, serving and monitoring.
- → Organised a transparent data and model workflow across the team.

Python · FastAPI · Docker · Kubernetes · PySpark · Metaflow

AI Platform for Enterprise Knowledge Management

2023 — 2024

State-of-the-art RAG-based Q&A platform across enterprise departments. Scalable, daily-updated knowledge base; Slack as conversational interface; Confluence as document source. Deployable on third-party cloud or fully on-prem.

- → Owned AI architecture and tech stack decisions.
- → Managed the data science team delivering the solution.
- → Integrated and benchmarked LLMs and embedding models.

Python · FastAPI · OpenAI · LLama · Faiss · Qdrant · Angle · Postgres

Domestic Appliance Manufacturer — Marketing & Pricing Analytics

2023

Marketing and pricing analytics pulling from GfK data, SKU sales and market segmentation. Outlier detection, pattern mining and extensive visualisation supporting business decisions.

- → Created the project plan and led the engineering team.
- → Validated client hypotheses; communicated results to business stakeholders.

Python · FastAPI · Plotly · Pandas · Sklearn

AI-Based Underwriter Platform

2022 — 2023

Underwriting platform analysing, aggregating and normalising data from multiple sources to replicate underwriter decisions, surface late-payer signals and monitor model vs. underwriter agreement in Grafana.

- → Built the ML model replicating underwriter decision procedure.
- → Designed Grafana dashboards monitoring customer scoring against expert decisions.
- → Validated ad-hoc hypotheses from business experts.

Python · Jupyter · Grafana · Pandas · Sklearn · XGBoost

Uvicorn

Cloud & DevOps

AWS · GCP · Azure · Docker · K8s · Nginx

Databases

Postgres · MongoDB · SQLite · Redis

Unified Communication Channels Platform

2022

Scalable platform consolidating B2C communication channels — low-latency chat, AI-suggested responses for support agents, semantic conversation analysis on microservices + OpenAI.

→ Extended a core microservice and built the OpenAI-powered suggestion algorithm.
→ Added semantic conversation analysis to improve agent experience.

GCP · Python · Kubernetes · Docker · Falcon · Flask · Redis · Spacy · OpenAI

Senior Data Science Engineer

as Perfectial

Feb 2019 — Aug 2022

PROJECTS

Real-Time Data Stream Analysis Platform

12 MONTHS

Platform receiving and analysing real-time data streams via gRPC with streaming + batch processing. ML models self-tune; browser-based visualisation for model categorisation.

→ Designed system architecture; created core components and REST API.
→ Prototyped data-visualisation charts; integrated libraries.

Python · Kafka · gRPC · Dash · TensorFlow · Scikit-learn

Document Validation Enhancement

3 MONTHS

Pre-validation layer ahead of a third-party ID-verification provider — catches low-quality, dark, blurry, B&W images, missing subject and photo-of-photo attacks.

→ Implemented the pre-validation system end to end.

Python · OpenCV · PyTorch

Lead Data Analyst / Data Science Engineer

NOVOS · Lviv

Nov 2019 — Feb 2021

PROJECTS

Company Metrics & Data Quality Platform

LEAD · 6 MO

Analytics on companies and employee behaviour. Identified data-quality issues and drove platform improvements for automated quality checks.

→ Led text analysis, multifactor analysis and business-oriented reporting.
→ Communicated insights to stakeholders; shaped downstream platform decisions.

Python · Pandas · NumPy · Matplotlib · NLTK · SciPy

Client Recognition & Profiling

DSE · 8 MO

Facial-recognition system for retail — auto-loads personalised profiles to assistants' devices to improve customer experience.

Python | OpenCV | PyTorch | TensorFlow | Keras | Flask | WebSocket

Platform Migration & Analytics Tooling

DSE · 8 MO

Migrated an existing analytics platform to a new cluster, rewrote core components and built custom tools for monitoring, output comparison and visualisation.

Python | Matlab | JavaScript | Flask | Dash

Data Science Engineer

ELEKS · Lviv

Jul 2018 – Jan 2019

PROJECTS

Automated Image Anomaly Detection

3 MO

Automated recognition system detecting anomalies in drone imagery of aircraft fuselage — cut manual identification hours significantly.

GCP | Python | OpenCV | TensorFlow | Keras

Surveillance Computer Vision System

3 MO

Real-time surveillance monitoring — object detection and activity heatmaps from office cameras for improved security.

→ Built the ML model and REST API; orchestrated the final solution.

Python | OpenCV | TensorFlow | Flask

Teaching

Instructor · Talented & Gifted Programme

Ukrainian Catholic University · Lviv

2019

Taught Basics of Programming (Python-first), with modules on web development and machine learning.

Hour of Code — instructor

Ukrainian Catholic University · Lviv

Since 2017

Annual HoC participation — hands-on programming sessions with visiting school children.
