PROFILE

Senior Data Science Engineer and AI engineering leader. 7+ years running engineering and management in parallel — shipping ML systems and growing teams. Helped scale Avenga's AI department from 7 to 30+ people; participated in a dozen presales. Available as AI Team Lead, Head of Data Science/AI, Senior DS Engineer, or consultant.

Experience

Avenga

ACQ. PERFECTIAL · NOV 2021 — Remote EU / Lviv — Feb 2019 – Mar 2026

AI Engineering Manager / Sr. AI Engineer

Aug 2022 – Mar 2026

ROLE & DEPARTMENT RESPONSIBILITIES

Department growth & team leadership

- Helped grow Avenga's AI/Data Science department from 7 to over 30 engineers over three years.
- Led distributed AI engineering teams of 2–10 data scientists and ML engineers across concurrent delivery streams.
- Ran regular 1:1s, career planning sessions and performance reviews; mentored engineers at mid and senior levels.
- Set technical direction and ML architecture standards shared across the AI practice.

Pre-sales & client engagement

- Participated in a dozen presales engagements — scoping, discovery workshops, technical proposals and client presentations.
- Translated client business goals into concrete ML/AI project plans; presented to stakeholders from engineers to C-level.
- Served as AI subject-matter expert in sales conversations — feasibility, effort estimation, risk and roadmap.

Hiring & technical evaluation

- Conducted technical interviews for AI/ML engineer roles — coding, system design and ML deep-dives.
- Designed and iterated on the interview rubric used across the AI practice; had final hiring sign-off for my teams.

AI practice & knowledge sharing

- Internal tech talks, shared evaluation patterns, reusable frameworks for RAG, agents and ML ops.
- Distilled learnings on LLMs, agentic systems and ML evaluation into internal playbooks.

YOC — Building a DSP Platform | Enterprise RAG Platform

POSITIONS CONSIDERED

- AI Team Lead
- Head of Data Science / AI
- Senior DS Engineer
- AI Consultant

EXPERT STACK

Worked across many more tools — listed here are the ones I know deeply.

Programming Languages

Python, Vanilla JavaScript

ML frameworks

Scikit-Learn, PyTorch, TensorFlow, Keras, XGBoost, LightGBM, TF.js

GenAI & NLP

OpenAI, Anthropic, LangChain, LangGraph, Agents, OpenClaw, MCP, Qdrant

Computer vision

OpenCV, PyTorch, TensorFlow, Keras

Data & viz

Metaflow, Seaborn, Plotly, Dash, Grafana

Web frameworks

Appliance Analytics | Underwriter AI | Unified Comms Platform

Python · FastAPI · Docker · K8s · PySpark · Metaflow · OpenAI · LLama · Faiss · Qdrant · Pandas · Sklearn · XGBoost · Grafana · GCP

Senior Data Science Engineer

as Perfectial

Feb 2019 — Aug 2022

Real-time data stream platform (gRPC + Kafka, self-tuning ML) and pre-validation layer for identity verification imagery.

Python · Kafka · gRPC · TensorFlow · PyTorch · OpenCV

Lead Data Analyst / Data Science Engineer

NOVOS · Lviv

Nov 2019 — Feb 2021

Analytics leadership on a company-metrics platform; built facial-recognition client profiling and migrated a legacy analytics cluster.

Python · OpenCV · PyTorch · TensorFlow

Data Science Engineer

ELEKS · Lviv

Jul 2018 — Jan 2019

Computer-vision systems — drone-imagery anomaly detection for aircraft fuselage and real-time surveillance heatmaps.

Python · OpenCV · TensorFlow · Keras · GCP

FastAPI · Flask · Falcon · Uvicorn

DOMAINS

ML Architecture · Agentic AI · Adtech · Team Leadership · Presales · Technical Hiring

EDUCATION

BSc Computer Science

Ukrainian Catholic University · Lviv

2015 — 2019

CERTIFICATIONS

Applied AI with Deep Learning

IBM Watson · Coursera · 2020

Recommendation Systems on GCP

Google Cloud · Coursera · 2019

COMPETITIONS

2018 ACM UA — World Semi-final

2017 ACM UA — World Semi-final
